

# Patterns

## Skill 2 - 20B

### Geometric Patterns

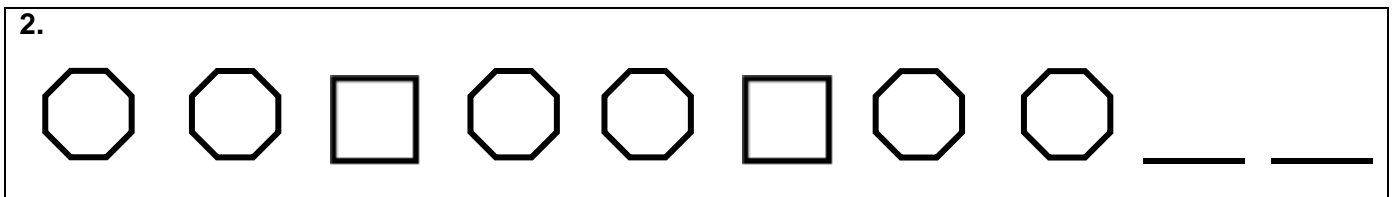

**Directions:** Fill in the blank spaces with the shapes that are next in the pattern.

1.

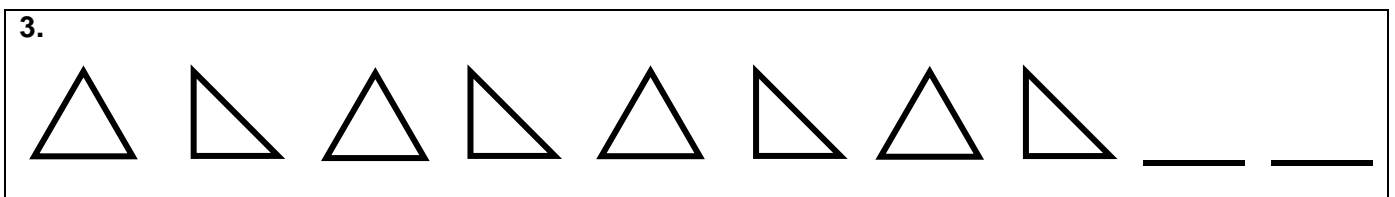

A sequence of eight geometric shapes: two triangles, a circle, two triangles, a circle, and two triangles. The pattern repeats every three shapes: triangle, triangle, circle. The sequence ends with two blank lines for the next two shapes in the pattern.

2.

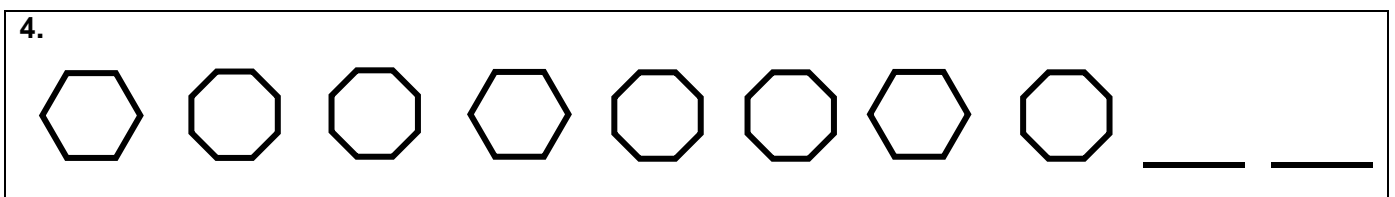

A sequence of eight geometric shapes: two octagons, a square, two octagons, a square, and two octagons. The pattern repeats every three shapes: octagon, octagon, square. The sequence ends with two blank lines for the next two shapes in the pattern.

3.

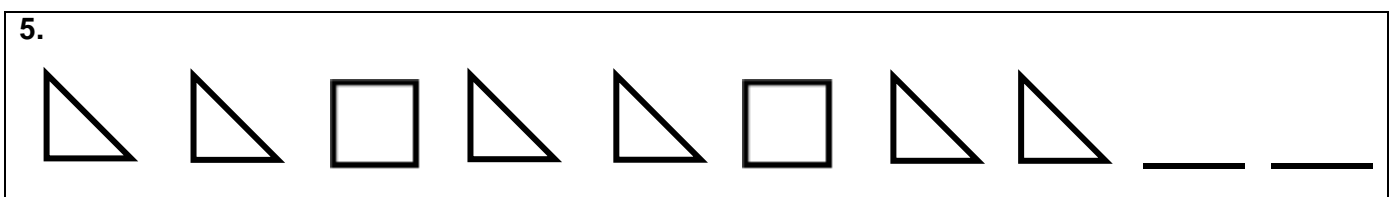

A sequence of eight geometric shapes: a triangle, a right-angled triangle, a triangle, a right-angled triangle, a triangle, a right-angled triangle, a triangle, and a right-angled triangle. The pattern repeats every two shapes: triangle, right-angled triangle. The sequence ends with two blank lines for the next two shapes in the pattern.

4.

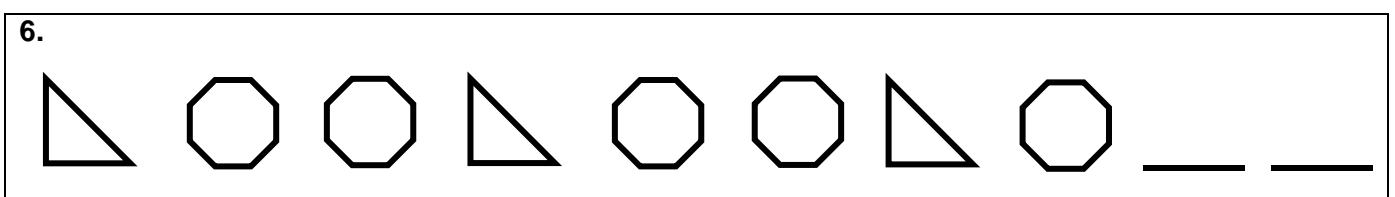

A sequence of eight geometric shapes: a hexagon, an octagon, an octagon, a hexagon, an octagon, an octagon, a hexagon, and an octagon. The pattern repeats every three shapes: hexagon, octagon, octagon. The sequence ends with two blank lines for the next two shapes in the pattern.

5.

A sequence of eight geometric shapes: two right-angled triangles, a square, two right-angled triangles, a square, and two right-angled triangles. The pattern repeats every three shapes: right-angled triangle, right-angled triangle, square. The sequence ends with two blank lines for the next two shapes in the pattern.

6.

A sequence of eight geometric shapes: a right-angled triangle, two octagons, a right-angled triangle, two octagons, and a right-angled triangle. The pattern repeats every three shapes: right-angled triangle, octagon, octagon. The sequence ends with two blank lines for the next two shapes in the pattern.
