

Division

Skill 3 - 13C

Relate Division and Subtraction

Directions: Look at the subtraction sentences and follow the directions.

Example

$$12 - 3 = 9 \quad 9 - 3 = 6 \quad 6 - 3 = 3 \quad 3 - 3 = 0$$

Subtracted 4 times.

There are 4 groups of 3 in 12. Write a division sentence that shows this.

$$\underline{12} \div \underline{3} = \underline{4}$$

1.

$$5 - 1 = 4 \quad 4 - 1 = 3 \quad 3 - 1 = 2 \quad 2 - 1 = 1 \quad 1 - 1 = 0$$

Subtracted _____ times.

There are 5 groups of 1 in 5. Write a division sentence that shows this.

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

2.

$$10 - 5 = 5 \quad 5 - 5 = 0$$

Subtracted _____ times.

There are 2 groups of 5 in 10. Write a division sentence that shows this.

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Division

Skill 3 - 13C

Relate Division and Subtraction

Directions: Look at the subtraction sentences and follow the directions.

3. $10 - 2 = 8$ $8 - 2 = 6$ $6 - 2 = 4$ $4 - 2 = 2$ $2 - 2 = 0$

Subtracted _____ times.

There are 5 groups of 2 in 10. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

4. $6 - 2 = 4$ $4 - 2 = 2$ $2 - 2 = 0$

Subtracted _____ times.

There are 3 groups of 2 in 6. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

5. $8 - 4 = 4$ $4 - 4 = 0$

Subtracted _____ times.

There are 2 groups of 4 in 8. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

6. $12 - 4 = 8$ $8 - 4 = 4$ $4 - 4 = 0$

Subtracted _____ times.

There are 3 groups of 4 in 12. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Division

Skill 3 - 13C

Relate Division and Subtraction

Directions: Look at the subtraction sentences and follow the directions.

7. $16 - 4 = 12$ $12 - 4 = 8$ $8 - 4 = 4$ $4 - 4 = 0$

Subtracted _____ times.

There are 4 groups of 4 in 16. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

8. $32 - 8 = 24$ $24 - 8 = 16$ $16 - 8 = 8$ $8 - 8 = 0$

Subtracted _____ times.

There are 4 groups of 8 in 32. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

9. $20 - 5 = 15$ $15 - 5 = 10$ $10 - 5 = 5$ $5 - 5 = 0$

Subtracted _____ times.

There are 4 groups of 5 in 20. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

10. $25 - 5 = 20$ $20 - 5 = 15$ $15 - 5 = 10$ $10 - 5 = 5$ $5 - 5 = 0$

Subtracted _____ times.

There are 5 groups of 5 in 25. Write a division sentence that shows this.

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Answer Key
Skill 3 - 13C

1. Subtracted 5 times $5 \div 1 = 5$

2. Subtracted 2 times $10 \div 5 = 2$

3. Subtracted 5 times $10 \div 2 = 5$

4. Subtracted 3 times $6 \div 2 = 3$

5. Subtracted 2 times $8 \div 4 = 2$

6. Subtracted 3 times $12 \div 4 = 3$

7. Subtracted 4 times $16 \div 4 = 4$

8. Subtracted 4 times $32 \div 8 = 4$

9. Subtracted 4 times $20 \div 5 = 4$

10. Subtracted 5 times $25 \div 5 = 5$
