

Nets: Skill 5 - 23A

3-Dimensional Figures: Polyhedrons

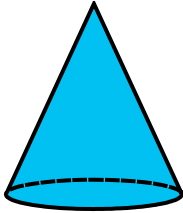

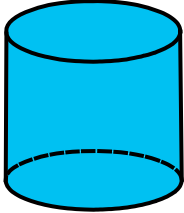

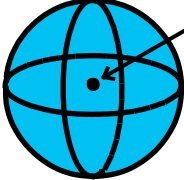

Test question answer at bottom of this page.

A polyhedron is a solid figure with flat faces. Each flat surface is a polygon.

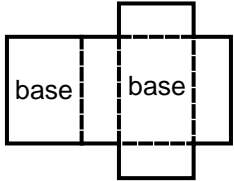

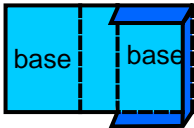

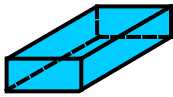

These solid figures are polyhedrons.

 <p>Square Pyramid</p> <p>How many faces does a square pyramid have? How many edges? How many vertices?</p>	 <p>Cube</p> <p>How many faces does a cube have? How many edges? How many vertices?</p>
 <p>Rectangular Prism</p> <p>How many faces? How many edges? How many vertices?</p>	 <p>Triangular Prism</p> <p>How many faces? How many edges? How many vertices?</p>

Curved Figures – These figures do not have flat surfaces. They are not polyhedrons.

 <p>Cone</p> <p>A cone has a flat circular base and one vertex.</p>	 <p>Cylinder</p> <p>A cylinder has two parallel bases that are congruent circles.</p>	 <p>Sphere</p> <p>A sphere is a three-dimensional surface. All points on its surface are equidistant from the center.</p>
--	--	--

Nets: a net is a two-dimensional pattern that can be folded into a three-dimensional figure.

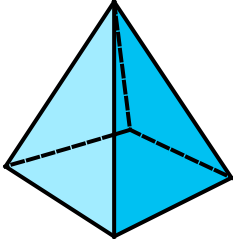

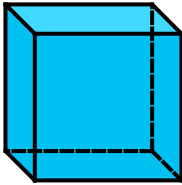

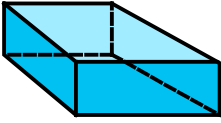

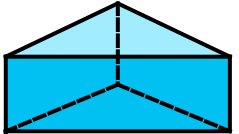

<p>What polyhedron with 6 faces can be made from this net?</p> 	<p>Three sides are folded on the dotted lines</p> 	<p>Fold along the remaining dotted lines to make a rectangular prism.</p> 
--	---	---

Nets: Skill 5 - 23A

Directions: Name the three dimensional figure that each net will make.

<p>1.</p> 	<p>2.</p> 	<p>3.</p> 
<p>4.</p> 	<p>5.</p> 	<p>6.</p> 
<p>7.</p> 	<p>8.</p> 	<p>9.</p> 
<p>10.</p> 	<p>11.</p> 	<p>12.</p> 

Answer Key Skill 23A Grade 5

 <p>Square Pyramid</p> <p>5 faces 8 edges 5 vertices</p>	 <p>Cube</p> <p>6 faces 12 edges 8 vertices</p>	 <p>Rectangular Prism</p> <p>6 faces 12 edges 8 vertices</p>	 <p>Triangular Prism</p> <p>5 faces 9 edges 6 vertices</p>
---	--	--	---

1. cube
2. square pyramid
3. rectangular prism
4. cylinder
5. triangular pyramid
6. triangular prism
7. triangular pyramid
8. cone
9. cube
10. rectangular prism
11. triangular prism
12. square pyramid
