

Skill 4-19E: Classify Quadrilaterals

A quadrilateral is a polygon with 4 sides and 4 angles.

Rectangle	Square	Rhombus	Parallelogram	Trapezoid
4 sides and 4 right angles. Opposite sides are equal and parallel	4 equal length sides and 4 right angles. 2 pairs of parallel sides.	4 equal length sides. 2 pairs of parallel sides.	2 pairs of parallel sides. Opposite sides are equal lengths.	1 pair of parallel sides.
				

Example

Classify this figure in as many ways as possible.
Circle each classification.

```

    graph TD
      Q(Quadrilateral) --- P(Parallelogram)
      Q --- T(Trapezoid)
      P --- R(Rhombus)
      P --- Re(Rectangle)
      R --- S(Square)
      Re --- S
  
```

General no parallel sides

It is a quadrilateral - 4 sides - 4 angles.

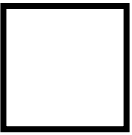

It is a parallelogram - 2 pairs of parallel sides.

It is a rhombus - 4 equal length sides and 2 pairs of parallel sides.

Answer: quadrilateral, parallelogram, rhombus

Directions: Classify each quadrilateral in as many ways as possible by circling each classification. The first one is done for you. Begin on number 2.

1.

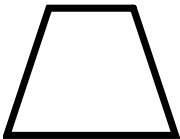

```

      graph TD
        Q(Quadrilateral) --- P(Parallelogram)
        Q --- T(Trapezoid)
        P --- R(Rhombus)
        P --- Re(Rectangle)
        R --- S(Square)
        Re --- S
      
```

General no parallel sides

2.

```

      graph TD
        Q(Quadrilateral) --- P(Parallelogram)
        Q --- T(Trapezoid)
        P --- R(Rhombus)
        P --- Re(Rectangle)
        R --- S(Square)
        Re --- S
      
```

General no parallel sides

Skill 4-19E: Geometric Figures

Classify Quadrilaterals

Directions: Classify each quadrilateral in as many ways as possible by circling each classification. The first one is done for you. Begin on number 2.

Skill 4-19E: Geometric Figures

Classify Quadrilaterals

Directions: Write on the blank lines on the diagram at the bottom of this page to complete the description of each quadrilateral.

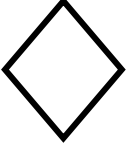

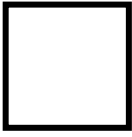

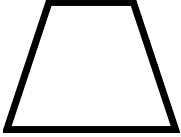

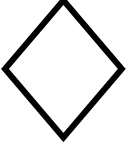

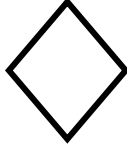

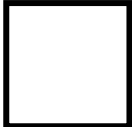

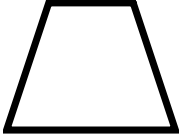

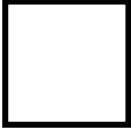

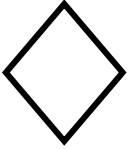

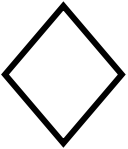

Rectangle	Square	Rhombus	Parallelogram	Trapezoid
				
2 pairs of parallel sides opposites sides are equal 4 right angles	2 pairs of parallel sides 4 equal sides 4 right angles	2 pairs of parallel sides 4 equal sides	2 pairs of parallel sides opposite sides are equal	1 pair of parallel sides

Skill 4-19E: Geometric Figures

Classify Quadrilaterals

Directions: Write the missing description on the line. Look at the similarities and differences as you compare two quadrilaterals in each problem. Use the table on page 4.

<p>15.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>rhombus</p>  <p>4 equal sides 2 pairs of parallel sides</p> </div> <div style="text-align: center;"> <p>square</p>  <p>4 equal sides 2 pairs of parallel sides</p> <p>_____</p> </div> </div>	<p>16.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>trapezoid</p>  <p>1 pair of parallel sides</p> </div> <div style="text-align: center;"> <p>rhombus</p>  <p>2 pairs of parallel sides</p> <p>_____</p> </div> </div>
<p>17.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>parallelogram</p>  <p>2 pairs of parallel sides opposite sides are equal</p> </div> <div style="text-align: center;"> <p>rectangle</p>  <p>2 pairs of parallel sides opposite sides are equal</p> <p>_____</p> </div> </div>	<p>18.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>rhombus</p>  <p>2 pairs of parallel sides 4 equal sides</p> </div> <div style="text-align: center;"> <p>parallelogram</p>  <p>2 pairs of parallel sides</p> <p>_____</p> </div> </div>
<p>19.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>rectangle</p>  <p>2 pairs of parallel sides 4 right angles opposite sides are equal</p> </div> <div style="text-align: center;"> <p>square</p>  <p>2 pairs of parallel sides 4 right angles</p> <p>_____</p> </div> </div>	<p>20.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>parallelogram</p>  <p>2 pairs of parallel sides</p> <p>_____</p> </div> <div style="text-align: center;"> <p>trapezoid</p>  <p>1 pair of parallel sides</p> </div> </div>
<p>21.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>square</p>  <p>4 equal sides 2 pairs of parallel sides</p> <p>_____</p> </div> <div style="text-align: center;"> <p>rhombus</p>  <p>4 equal sides 2 pairs of parallel sides</p> </div> </div>	<p>22.</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>rectangle</p>  <p>2 pairs of parallel sides opposite sides are equal</p> <p>_____</p> </div> <div style="text-align: center;"> <p>rhombus</p>  <p>2 pairs of parallel sides 4 equal sides</p> </div> </div>

Skill 4-19E: Geometric Figures

Classify Quadrilaterals

Directions: Draw a quadrilateral that matches each description below. Then write the name of the quadrilateral. Use the table on page 4.

<p>23.</p> <p>4 equal length sides. 2 pairs of parallel sides. No right angles.</p>	<p>24.</p> <p>1 pair of parallel sides.</p>
<p>25.</p> <p>2 pairs of parallel sides. opposite sides are equal. no right angles</p>	<p>26.</p> <p>2 pairs of parallel sides 4 equal length sides 4 right angles</p>
<p>27.</p> <p>1 pair of parallel sides.</p>	<p>28.</p> <p>2 pairs of parallel sides. opposite sides are equal. no right angles</p>
<p>29.</p> <p>2 pairs of parallel sides 4 equal length sides 4 right angles</p>	<p>30.</p> <p>2 pairs of parallel sides opposite sides are equal 4 right angles</p>

Answer Key 4 - 19E

Note: Every square is a rectangle but this is not shown in the answer sheet.

1. is an example - square, parallelogram, quadrilateral, 2. trapezoid, quadrilateral

page 2

3. rhombus, parallelogram, quadrilateral

4. trapezoid, quadrilateral

5. parallelogram, quadrilateral

6. rectangle, parallelogram, quadrilateral

7. square, parallelogram, quadrilateral

8. rhombus, parallelogram, quadrilateral

page 3

9. parallelogram, quadrilateral

10. rectangle, parallelogram, quadrilateral

11. trapezoid, quadrilateral

12. square, parallelogram, quadrilateral

13. rhombus, parallelogram, quadrilateral

14. rectangle, parallelogram, quadrilateral

page 4 -fill in the blank diagram

quadrilateral - 4 sides - 4 angles

trapezoid - 1 pair of parallel lines

parallelogram - 2 pairs of parallel sides - opposite sides are equal

rhombus - 2 pairs of parallel sides - 4 equal sides

rectangle - 2 pairs of parallel sides - opposite sides are equal - 4 right angles

square - 2 pairs of parallel sides - 4 equal sides - 4 right angles

page 5

15. 4 right angles

16. 4 equal sides

17. 4 right angles

18. opposite sides are equal

19. 4 equal sides

20. opposite sides are equal

21. 4 right angles

22. 4 right angles
